

AP400

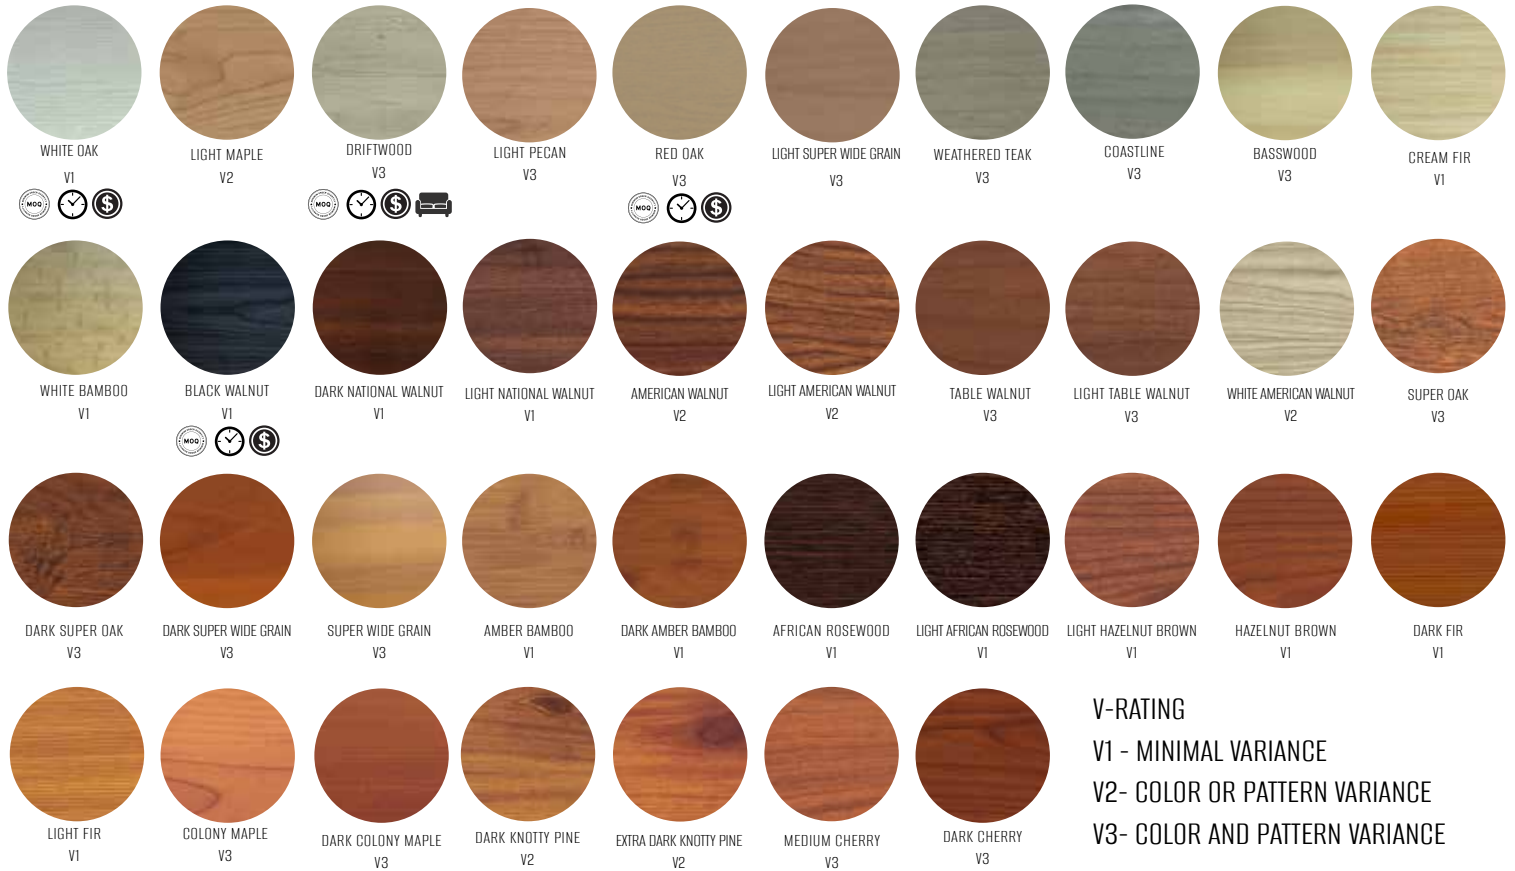

Full Depth Aluminum Plate

AP400 Aluminum Plate is an exceptionally high-performance, architectural aluminum façade. AP400 Aluminum Plate was created with flexibility and ease of the designer in mind. Equally effective as an exterior rainscreen application or in the interior space, AP400 Aluminum Plate comes in several of solid aluminum gauges to meet your specification needs. Using the same licensed, proprietary, sublimation technology as Mosaic, AP400 Aluminum Plate can be finished in a variety of color and visual texture options including wood, marble, granite or just about any custom color you can imagine. Class "A" fire rated and NFPA 285 compliant, AP400 Aluminum Plate offers a durable solution ideal for high traffic areas including lobbies, elevator wraps, or interior gathering spaces. As a 100% recyclable material made in the USA, AP400 Aluminum Plate can also help your project meet many of your green building initiatives.

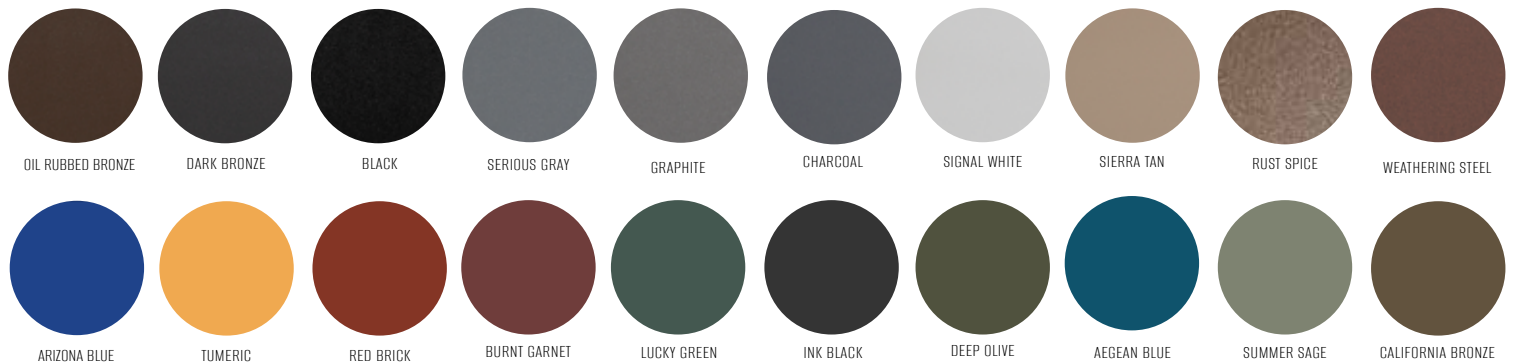

USES:

Architectural Rainscreen system for exterior cladding or interior wall applications. Great for elevator or column wraps.

WOOD FINISHES
